

Deck Medic Chemical Solutions Starter Kit

This is Deck Medic's Chemical Solutions Starter Kit. Within this kit are the chemical components used to strip & remove residual stain or sealant product from outdoor wood, and properly prepare the wood for staining. These same components are used to properly prepare *new* or *weathered* wood for staining. The Starter Kit has enough of the components to prepare approximately three medium-sized decks for staining.

Over the many years, we at Deck Medic have used these chemical components on thousands of decks, fences, and other outdoor structures with amazing success. The purpose in providing this free Starter Kit is because you have expressed interest in being able to strip & prepare outdoor wood quickly and effectively. We're confident that once you use our exclusive chemicals, you will be compelled to purchase greater quantities for use in your stain and seal business.

Instructions on proper use of these products are included within. You will also find detailed instructions and videos at www.deckmedicupply.com, or by using the QR code below.

CAUTION. Chemical strippers and brighteners have the potential to burn your skin and cause eye damage. Always wear Personal Protective Equipment (PPE) when opening, mixing, applying, and removing any of the included chemicals. Consult specific Safety Data Sheets for more information.

If you would like information on becoming a Deck Medic Franchise Owner, please contact our VP of Franchise Development, Jeff Konopack at jeff@mydeckmedic.com, or go to www.deckmedicfranchise.com.
